

PRODUCT OVERVIEW

Cyber Secure Managed Phishing

Six Degrees Group is a leading hosting and managed services provider to the UK mid-market. The company specialises in delivering application performance management, monitoring, reporting and security, deployed on hybrid public/private cloud platforms of innovation. Everything Six Degrees does is underpinned by its data centres, data network and voice switching infrastructure.

Why do I need Cyber Secure Managed Phishing?

Modern phishing emails are sophisticated, comprehensively planned and often able to beat even the most advanced spam filters. They use social engineering to encourage users to click on malicious links and carry out money transfers that cost businesses financial, operational and reputational damage. The most effective way to protect your business from phishing attacks is by educating your users.

What is 6DG Capital Support's Cyber Secure Managed Phishing?

Six Degrees Capital Support can improve user awareness and behavioural response through our Cyber Secure Managed Phishing service.

Delivered as a managed service and delivered in partnership with phish'd, Six Degrees Capital Support will manage all aspects of:

- the delivery of a controlled quarterly phishing attack,
- the collection and correlation of data to support staff education and
- the presentation of information in a concise format

All of the abovementioned items will allow you to track improvement over time.

The Cyber Secure Managed Phishing service can be adopted as a stand-alone service or as part of a larger deployment of 6DG Capital Support's managed services and support. The table below shows the key features and benefits:

Features	Benefits
Scenario Selection	Choose from a range of scenarios to improve awareness of changing risks.
Recipient Control	You select who should or should not be included in the testing program.
Regular Testing	Quarterly phishing tests scheduled around your business needs.
Reporting	A standard quarterly report which identifies areas for improvement.
Information Security Led	Your report will be presented at a meeting by one of our Security team.
Smart Whitelisting	We will manage the changes to your filtering and security protection to allow tests to be undertaken.
Supporting Education	Education conditions employees to behave more securely in the event of an attack.

What is Phishing?

Phishing emails are sent by cybercriminals. They are designed to closely resemble legitimate emails, and their aim is to steal confidential information. Phishing emails aren't trying to sell prescription drugs through suspect online vendors – most users are now able to spot and delete these, even if they occasionally find their way through email filters.

Instead, phishing emails mask themselves as messages from organisations such as banks and online stores, and try to convince users – through various means of persuasion – to reveal confidential information.

Let us help you

Cyber Secure Managed Phishing is just one solution from our compelling product portfolio structured and designed to solve your business security needs. With incredible support from our passionate in-house engineers alongside an innovative offering to create the solution that you need, we will be happy to help.
