

PRODUCT OVERVIEW

Backup as a Service [BaaS]

Six Degrees' Backup as a Service [BaaS] provides an Enterprise-grade, resilient cloud backup platform for customers to be in control of their backup process for mission-critical business data. Backing up your data, ready to be restored in the event of an accident, outage or disaster.

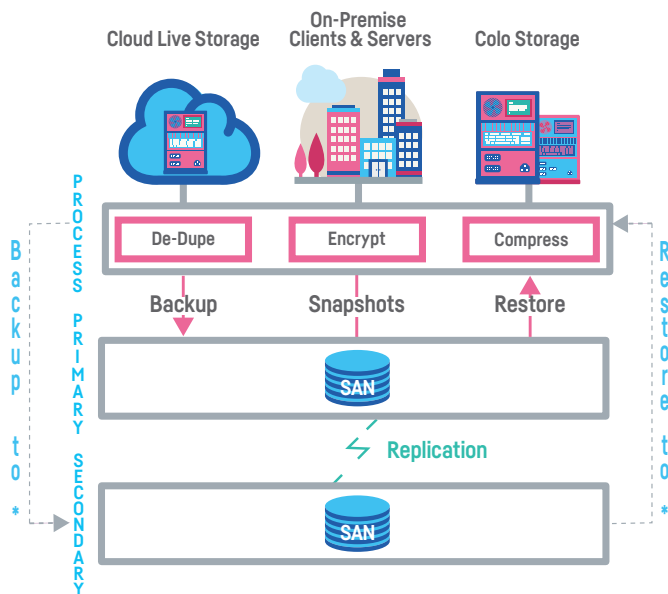

Why a Backup as a Service solution?

Data usage is growing, and, with it, the necessity to ensure that business critical data is backed up in line with the requirements of your organisation. Building off-site data centres is expensive, operationally intensive and a long-term investment. Six Degrees' BaaS:

- Gives you an off-site cloud backup solution,
- Offers a cost-effective backup strategy for protecting your business, and
- Lets you be in control of your backup process or
- Can be fully managed by Six Degrees - leave your backup process and administration to us!

Backup forms an integral part of your Business Continuity process. A secure, compliant, scalable backup solution allows you to quickly react to the challenging demands of data protection.

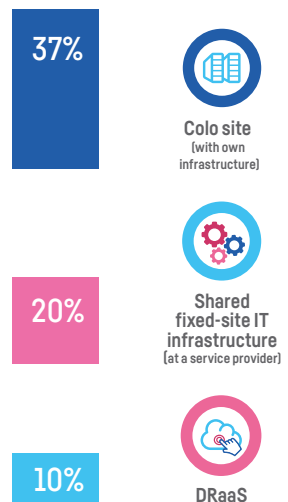

*if primary fails, only if customer takes secondary backup option

Disaster Recovery Preparedness

45% of businesses are not prepared

or only somewhat prepared to recover in the event of a site failure or disaster

67% of DR decision makers source recovery or alternate DC sites

Key Benefits

Configurable Retention	Definable retention periods ensure you are protected in line with your business and compliance requirements.
Scalable Backup	Scalable off-site data storage available 24x7 that grows with your backup needs.
Resilient Architecture	Your data off-site and backed up into primary and secondary geographically diverse zones.
Configurable RPO	Definable Recovery Point Objectives [RPO] allowing key data to be saved more frequently.
Data Security	Data is encrypted prior to transmission, in flight, and at rest to ensure your data is secure.
Data Backup	Compressed and deduped data means fast and regular transfers over the wire and less cost to store.
Backup/Restore	Granular capability at file, folder and full server level giving a true backup feature.

Let us help you

Six Degrees BaaS is just one solution from our compelling product portfolio structured and designed to solve your business infrastructure needs. With incredible support from our passionate in-house engineers alongside an innovative offering to create the solution that you need, we will be happy to help.
