

# Hybrid Cloud Adoption Strategy Workshop

Our half day workshops are designed to help you understand your business priorities and uncover the factors that will influence your hybrid cloud adoption strategy.

## Why do I need a Hybrid Cloud Adoption Strategy?

Cloud-based transformation projects have high expectations and visibility, but too many initiatives fall short due to a lack of alignment between IT and the wider business.

Organisations that embark on cloud computing initiatives without a clear strategy struggle to realise the full benefits. We can help.

## Why should I book a 1/2 day workshop?

The key purpose of these sessions is for us to help you pave the way for a successful cloud journey by facilitating cross-team collaboration and decision-making.

Each workshop can be delivered on your premises and will be led by one of our cloud strategists.

## Scope

Our Hybrid Cloud Adoption Strategy Workshop will provide you with:

- A common view of cloud concepts, benefits and adoption fears,
- A clear understanding of Cloud governance requirements,
- An alignment of Cloud IT requirements to your strategic business objectives,
- Best practice in respect to data centres, IT infrastructure, applications and service,
- An understanding of cloud solutions relevant to your business,
- Priority candidates for cloud migration and the associated benefits of expediting.

## How it works

1. Contact your account manager to schedule,
2. Complete our preparation questionnaire,
3. Provide us with an inventory of IT systems and logical/physical systems in use,
4. Six Degrees confirm suitability, date and send you an agenda.

## Key Outputs

Following a workshop you will benefit from:

- A solid and comprehensive understanding of the current cloud landscape,
- A clear rationale for your cloud strategy,
- An initial view on your potential workloads ready for our cloud assessment,
- A cloud maturity evaluation to show your progress as you advance through your cloud journey.
