Insurance Solutions

Today's insurance markets are becoming increasingly dynamic and fragmented.

New, disruptive market players conspire with pervasive regulatory requirements to pile the pressure on businesses seeking to maintain a foothold in what remains a highly competitive sector.

How can your insurance business transition away from prohibitive legacy systems, leveraging the latest cloud technology to improve risk modelling, enhance customer experience, and attract the best talent to take you through the next phase of your evolution?

> "We've made substantial investments into the digital and technological side of our business in order to evolve with the changing environment. Six Degrees has played a vital role in this technology evolution, which we see as being imperative to our continuing success in the industry."

Maintain data integrity, security and compliance

In a market driven by data, the integrity and security of that data is paramount. Meet PRA and FCA regulations with a purpose-built infrastructure, correctly configured and managed proactively to meet insurance industry standards.

- **Leverage data encryption capabilities** through cloud and SD-WAN, mitigating the risk of data breach and resultant fines and reputational damage.

- **Ultra-secure storage** in managed cloud and Tier III+ data centre colocation facilities, keeping your customers' personal and transactional data safe from breach.

- **Managed CSOC and SIEM capabilities** and cyber security managed services and tools, developed and managed utilising decades of experience, protecting you and your customers from evolving cyber security threats.

Throw off the shackles of legacy systems

Compete with market disruptors by transitioning away from legacy systems that prevent you from reaching your digital transformation targets. Embrace a modernised cloud infrastructure, enabling you to protect profit margins and enhance business agility.

- **Highly available and resilient** public, private and hybrid cloud-based platforms procured on a consumption-based model, enabling cost scaling and allowing you to adapt quickly to changing business demands.

- **Cloud strategy workshops and assessments** ensure the most appropriate cloud migration approach, minimising risk and maximising cloud ROI for your business.

- **Security best practices** built-in at every level, mitigating the risk of data breach and resultant financial, operational and reputational damage, ensuring you remain compliant with PRA and FCA regulations.

- **Advanced data analytics and machine learning** powered by the cloud, enabling you to undertake proactive optimisation exercises and reinvest savings in further innovation.

Leverage data for improved risk modelling

Collect, store and process large data volumes using the power of the cloud. Run data models more efficiently in the cloud using big data, machine learning and AI to predict risk more quickly, accurately and consistently.

- **Highly available, resilient, secure and burstable** public, private and hybrid cloud platforms, enabling you to achieve optimal data storage and processing capacity.

- **Flexible cloud platform and data services**, enabling you to rapidly scale resources to meet peaks in demand and deploy dedicated data modelling platforms, only paying for what you use.

- **Unify data from across legacy applications** and deploy mission-critical compute power to deliver more accurate risk modelling and rapid decision making.

Enhance customer experience

Deliver personalised policyholder experiences and engage customers anywhere, anytime by empowering your agents with multi-channel communications platforms.

- **Optimised cloud platforms** that allow you to leverage big data and AI. Streamline customer quoting and personalise offers to deliver the best value and experience, enabling you to win new customers and retain existing ones.

- **Market-leading contact centre solutions** and multi-channel collaboration tools, enabling efficient and effective customer knowledge management and service delivery.

- **Cloud, voice and data services** with GDPR and PCI compliance built-in, delivering ultimate peace of mind.

Attract top talent

80% of insurance CEOs are concerned about the impact of skills shortages on their growth prospects. Attract the best talent by embracing the latest trends in flexible working and empowering employees with the tools they need to succeed.

- **Cutting-edge applications** and devices that meet employee expectations whilst maintaining a consistent cyber security posture throughout your operations, safely putting the right tools in the best talent's hands.

- **Market-leading** unified communication and collaboration tools, maximising productivity and enabling seamless agile working.

- **Guidance from experienced security professionals** on tools and best practices to ensure increased agility does not lead to compromised security.
