

OLIVER

Six Degrees allows a stable foundation for OLIVER's global clients

OLIVER

Part of the Inside Ideas Group, OLIVER is a leading marketing company that builds in-house agencies for some of the world's most creative brands. Their unique model places 2000 staff inside the client's world across 90 countries; operating at the speed of modern business to help clients deliver better work faster and more cost effectively.

Challenge

OLIVER's model is what sets it apart from the competition – but it comes with its own set of IT and connectivity challenges. Jason Yun, OLIVER's IT Manager, explains: "A lot of traditional agencies support clients remotely. We're unique because we put our talent in our clients' businesses – everyone from creative directors to account managers sit in-house, developing solutions in real-time to move the brand forwards."

OLIVER therefore needed an agile connectivity service to meet clients' exact, and often nuanced, needs on a site-by-site basis. "When a new client joins OLIVER, we look at the full scope," adds Jason. "We then begin the connectivity process, putting-in internet lines, setting-up servers and providing hardware. Essentially, we build a fully-operating office within an office, which is a process that needs to be as painless as possible no matter where our client is in the world. It's why reliable, fast and quality connectivity is essential to OLIVER's offering."

About Six Degrees

We are a cloud-led managed service provider. We work as a collaborative technology partner to businesses making a digital transition.

Always placing clients at the heart of our strategy, our passionate teams combine technical expertise and deep sector specific knowledge to innovate, craft and manage the right solutions to power businesses.

The breadth and strength of our technology is our foundation. Solutions range from data and application performance management through to colocation and unified communications, all with private, public and hybrid cloud at its core.

We work collaboratively and build long-term partnerships through exceptional services that match our clients' needs. We continually innovate the right solutions to enable our clients' brilliance.

OUR SOLUTIONS

Cloud Platform & Data

Modernise your data centre and secure your hybrid cloud future.

Cyber Security & Compliance

Enhance your cyber security posture and safeguard your organisation.

Agile Workspace

Communicate, collaborate and work efficiently, anywhere.

Network Infrastructure

Achieve a step change in your connectivity and your digital transformation journeys.

Solution & Outcome

Six Degrees understood the importance of connectivity for OLIVER's business, and worked closely with OLIVER to ensure we met their digital transformation goals.

Because each one of OLIVER's clients had a different set of requirements, we needed a wide breadth of solutions.

Six Degrees' Managed Wide Area Network (WAN) service has allowed OLIVER to deliver internet services and end-to-end productivity suites universally. Designed to integrate with client teams, it connects OLIVER's sites and scales according to demand. A centralised managed firewall, layered into the WAN service, also provides OLIVER with secure access to their staff on the ground.

Our Unified Communications as a Service (UCaaS) product also sits on the WAN, allowing OLIVER's teams to communicate and collaborate, improving productivity as well as client experience.

Jason said: "Six Degrees has been a brilliant partner. It may just be internet lines, but it's so important to what we do, how we stay in touch with staff around the world and the success of our client's businesses."

THE CLIENT

Jason Yun
IT Manager, OLIVER

"Six Degrees has been a brilliant partner. It may just be internet lines, but it's so important to what we do, how we stay in touch with staff around the world and the success of our clients' businesses."

ADVANTAGES AND BENEFITS

Rapid roll-out of new circuits

Six Degrees handles all aspects of connectivity circuit provisioning, ensuring there are no unnecessary delays and getting sites online as quickly as possible. This allows OLIVER to deploy teams to site as soon as possible after a pitch has been won.

Leveraging the Six Degrees Next Generation Network

OLIVER goes beyond MPLS by leveraging the Six Degrees Next Generation Network. Each OLIVER site is connected through the most appropriate communications technology, and the business is able to achieve seamless communications throughout its worldwide operations.

Ubiquitous Unified Communications

OLIVER's UCaaS solution delivers a ubiquitous service throughout the business, maximising productivity by offering users the same level of communication and collaboration functionality regardless of where they work.

Resilient Colocation and Enterprise Cloud Platform

By hosting servers in Six Degrees data centre facilities, OLIVER improves user experience by increasing available bandwidth at its office location whilst achieving optimal levels of uptime, availability and security.
