

# Virtual Classroom in a Box

Take your lectures online and deliver brilliant learning experiences to virtual classrooms

Email [cloudsales.pg@6dg.co.uk](mailto:cloudsales.pg@6dg.co.uk) to find out more

Schools and universities face the challenge of delivering personalised, high quality learning experiences outside of the traditional classroom and lecture hall. With many teachers and lecturers unfamiliar with the latest teleconferencing technology and increased scrutiny around tuition fees and value for money, it's essential that schools and universities are proactive in overcoming the operating challenges they face in this new reality.

Six Degrees offers packaged hardware and consultancy services that make it straightforward for teachers and lecturers to deliver brilliant learning experiences to virtual classrooms. Our Virtual Classroom in a Box is straightforward to setup and use, and combines high quality audio and visual aids with the power and agility of Microsoft Teams. And to make things even easier, Six Degrees will support you every step of the way.

## Our Remote Learning Solutions

### For Teachers and Lecturers

Pre-configured hardware shipped directly to teachers/lecturers

Basic package for teachers/lecturers with hosting hardware

Advanced package for teachers/lecturers that need lecture hosting hardware

Consultancy-only package for teachers/lecturers with hosting and AV hardware

Personalised, in-depth adoption and training

Technical support for first live event

### For Students

Hardware shipped directly to students

Detailed online setup and usage tutorials

# Deliver brilliant learning experiences to virtual classrooms

Utilise the most appropriate Microsoft Teams meeting format to deliver your virtual classrooms

Relieve the burden of the mass training and hardware procurement required to equip your teachers or lecturers for remote learning

Pre-configured hardware shipped directly to teachers and lecturers' homes, along with students if needed

Recordings of lectures can be securely and automatically made available to all students via Microsoft Stream, or downloaded for distribution via another method

Up to 10,000 students can join at any one time, and the Azure Content Delivery Network (CDN) leverages Microsoft's global network to allow the lecture to be viewed worldwide with no buffering

Q&As can take place in real-time should students need to raise any questions, and Microsoft Forms can be used to distribute auto-marking tests and quizzes

Attendee reports are available through the live event usage report which shows the activity overview of the live events held in the organisation. Admins can view event usage information, including event status, start time, views and production type

Live captions for any students with additional accessibility needs
