

The communities that Police Forces serve are increasingly diverse and complex, necessitating a more sophisticated response to the challenges the authorities face now and in the future. Whether its exploitation, domestic abuse, cybercrime or new threats from serious and organised crime like human trafficking or terrorism, Police Forces must acknowledge that if they are to meet their communities' needs, they must continue to adapt to the modern policing environment.

“We see the effective implementation of new technologies as critical to policing in the 21st century. That Six Degrees could focus on our organisational needs and apply suitable solutions was key to the success of the project”

- Head of IT, Territorial Police Force

What is your Police Force's approach to making transformational change across the entire scope of your operations? How will you harness the power of digital, data and technology to better protect the communities you serve? How will you maintain a clear vision that keeps your improving policing for your community at its heart?

Deliver a seamless citizen experience

Deliver seamless, digitally enabled experiences. Give your community more choice in how they engage with you, using the channels, media or devices most relevant to them.

- Align services to UK Police Forces' operational and compliance requirements, enabling you to deliver frictionless digital interactions that enable your community to interact with you and share knowledge easily through smartphones and web-based portals.
- Strengthen relationships with your community by delivering seamless, ubiquitous and frustration-free ways to interact with your Force, whether through mobile devices, social media or on phone calls.
- Harness shared data and connected devices ethically and securely, enabling you to share data across county lines with other forces and with government agencies, helping you tackle crime that takes place on a national scale.
- Achieve high quality, ever-present access to technology in order to maximise your digital transformation investment, giving your officers and support staff access to the digital tools they need to remain effective whilst in the field.

Address harm

Harness the power of digital technologies to analyse behaviours, identify the risk of harm and protect the vulnerable in the physical and digital world. Deliver earlier, more precise and highly targeted proactive policing.

- Harness the data you have to uncover and highlight insights and trends that complement human judgement, giving your officers access to timely, relevant information and enabling you to predict and prevent crimes before they take place with increased presence in challenging locations.
- Use the most appropriate tools to identify criminal activity and achieve real-time mobile field tasking, giving your officers the situational awareness they need to enforce the law quickly and safely and keep your community safe from harm.
- Design and deliver digitally-enabled regional and national Forces that collaborate across boundaries, enabling you to connect with other Police Forces in a seamless manner that enhances your ability to tackle large-scale crime that is committed across county lines.

Enable officers and staff through digital

Invest in your people, from leadership through to frontline mobility, to ensure they are equipped with the right knowledge, skills and tools to deal with increasingly complex crimes.

- Plan the most effective digital transformation journey for your Police Force by leveraging our extensive capabilities and public sector pedigree, enabling you to carry out targeted activities that improve the quality of service you deliver to your community.
- Improve officers' collaboration with support functions and provide them with the digital tools they need to complete case work in the field, streamlining evidential collection and ensuring that when they are on duty the technology they use is always a help, not a hindrance.
- Enable your officers to remain safe, productive and situationally aware, with the latest tablets and wearable technology allowing them to make better tactical decisions and reduce administrative tasks often performed back at the station whilst staying safe and acting with transparency.

Embed a whole public system approach

Foster a philosophy of openness and deepen your collaboration with public sector partners to jointly design and tackle complex public safety issues – sharing data insights and making use of digital tools to work more effectively across the public safety system.

- Transform your community's experience through smarter, faster technology solutions that enable your officers and support functions to be at their very best, wherever they are, with smartphone and application functionality that works the way people do in their day-to-day lives.
- Share data seamlessly and securely to deepen your collaboration with public sector agencies to unlock effectiveness, helping you ensure improved investigative outcomes when dealing with complex and often large-scale organised crime.
- Improve community experience by consolidating case management systems and uniting your support functions with operational officers and citizens, ensuring officers are able to support your community quickly, efficiently and safely when called into action.

Empower the private sector

Strengthen your relationships with the private sector to empower it to appropriately share in public safety responsibilities. Explore new ways to safely empower those with an active desire to help.

- Ensure your officers are active and effective by giving them access to the latest, most appropriate equipment and applications, including tablets and wearables that make it easier for them to carry out their duties.
- Roll-out new capabilities rapidly with the ability to purchase services quickly and through a commercial flexible model, ensuring your officers and supporting staff have access to the best tools to carry out their duties effectively.
- Support the private sector's role in digitally-enabled community safety and foster a vibrant PoliceTech landscape, driving innovation and ensuring UK policing is proactive in tackling the growing crime landscape.
